

FridgeFreeze portable vaccine refrigerators and freezers

All FridgeFreeze portable vaccine refrigerators and freezers work with 12/24 and 110/240 volts. All units include an internal fan to prevent thermal layering and keep a consistent temperature throughout the entire FridgeFreeze. For precise temperature control, a digital thermostat is standard with built-in temperature alarms. All units come with a lockable latch and a cart for easy transportation of the portable FridgeFreeze unit.
